No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         hypothetical

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  01-MAY-1999, sequence version 1.
07-FSB-2006, entry version 39.
MLN64 N-terminal domain homolog (STARD3 N-terminal-like protein).
Name=STARD3NL; Synonyms=MENTHO; ORFNames=UNQ855/PRO1864;
Homo sapiens (Human)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    MEDLINE=22384343; PubMed=12393907; DOI=10.1074/jbc.M208290200; Alpy F., Wendling C., Rio M.-C., Tomasetto C.; "MENTHO, a MLN64 homologue devoid of the START domain."; J. "Identification of G protein-coupled receptor genes from the human
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 -i- SIMILARITY: Belongs to the G-protein coupled receptor 2 family. IN-TM7 subfamily.
-i- SIMILARITY: Contains 1 GPS domain.
-i- CAUTION: Ref. 2 sequence differs from that shown due to erroneous gene model prediction.
                                                                                                                                                                                                                                                                                                         effort to identify novel human secreted and transmembrane proteins: bioinformatics assessment."; Genome Res. 13:2265-2270(2003).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   IsoId=Q81ZF5-2; Sequence=VSP 012815, VSP 012816, VSP 012817; Note=Ref.3 (AAQ88581) sequence is in conflict in position:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   MUCLEOTIDE SEQUENCE [LARGE SCALE MRNA] OF 797-942.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Waters J.M., Lopez J.A., Wallis G.P.;
"Molecular phylogenetics and biogeography of galaxiid fishes
(Osteachthyes: Galaxiidae): dispersal, vicariance and the position of Lepidogalaxias salamandroides.";
Syst. Biol. 49:777-795(2000).
-!- FUNCTION: Component of the ubiquinol-cytochrome c reductase complex (complex III or cytochrome b-c1 complex), which is a respiratory chain that generates an electrochemical potential coupled to ATP synthesis (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               NUCLEOTIDE SEQUENCE.
